Pressurized Irrigation Notice to All Residents

The Payson City Water Department will be shutting down the pressurized irrigation system on Friday September 29th.

Here are a few things you should know:

- Once the water has been shut off to the pressurized irrigation system it will take a few days for the residents to drain the ponds. The city will then go open all the valves to drain the system for the winter.
- If you have a sprinkler system you can leave your valve open to drain into the city system. Make sure your main P. I. valve is then turned off once your system has drained.

We appreciate all who have helped to conserve water this summer so that we were able to make it to the end of September. Thank you.
